

## Armored Chemical Pumper

Hand-Painted By Yours Truly

Drawing From Model Box

The Real Thing

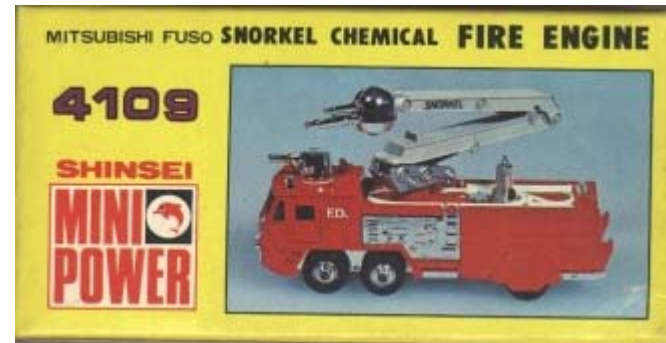

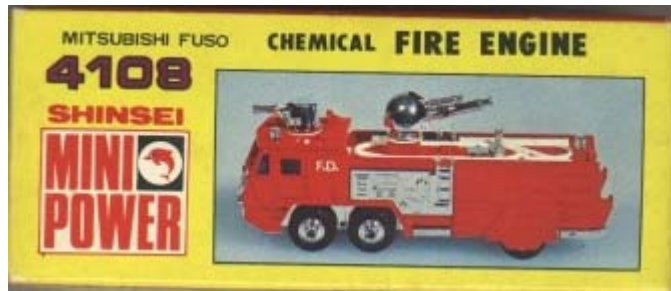

1979 Fuso armored foam pumper, Sakai Fire Department, Takaishi station. Equipped with Morita ME-7A pump, carries 1300 liters of foam and 230 kilograms of dry powder. Stationed near factory with explosive hazards. Majority of apparatus is covered. Dry powder turret on roof, plus nozzles over windshield and below bumper. Also equipped with dry-powder hose reel. Nitrogen gas propellant and dry-powder containers stored in rear section. Mid-mounted turret is remote controlled combination water cannon and dry-powder nozzle. Turret mechanisms protected by metal dome. Both pump and nozzle can also be operated away from apparatus, using direct-wire remote control.

Text, as translated by AltaVista Dot Com, and apparatus photo again from **from <http://www.asahi-net.or.jp/~xg4m-hsmt/>**.

Another armored pumper from the archives of a Japanese fire department site whose address I've since lost:
