

**CUMBERLAND CO.
FIRE DEPT.**

And quickly and efficiently

RADIO CENTRAL

PHONE 483-4191

The sole purpose of this publication is to provide the general public, businessmen, and present and future industry with a helpful resume of the county-wide Volunteer Fire Departments.

The first of these departments was organized in 1956; presently there are fifteen well equipped stations with trained personnel. Although the members of these departments are termed volunteers, they look toward the job of fire protection and prevention with a professional attitude. The Rural and Urban Cumberland County Volunteer Fire Departments have worked long and hard to bring about the best fire protection and fire prevention possible. Saving lives and property is our primary purpose.

Bringing all areas of the county closer together in a mutual agreement has helped in many ways to bring the many separate communities together on common ground. — not only for saving lives and property, but for any other community program that needs promoting for the good of the people of Rural and Urban Cumberland County.

For further information, contact the fire chief in each respective district.
